- New mast access : ladders and platforms
- Compatible with all K mast systems
- Developed with GEDA

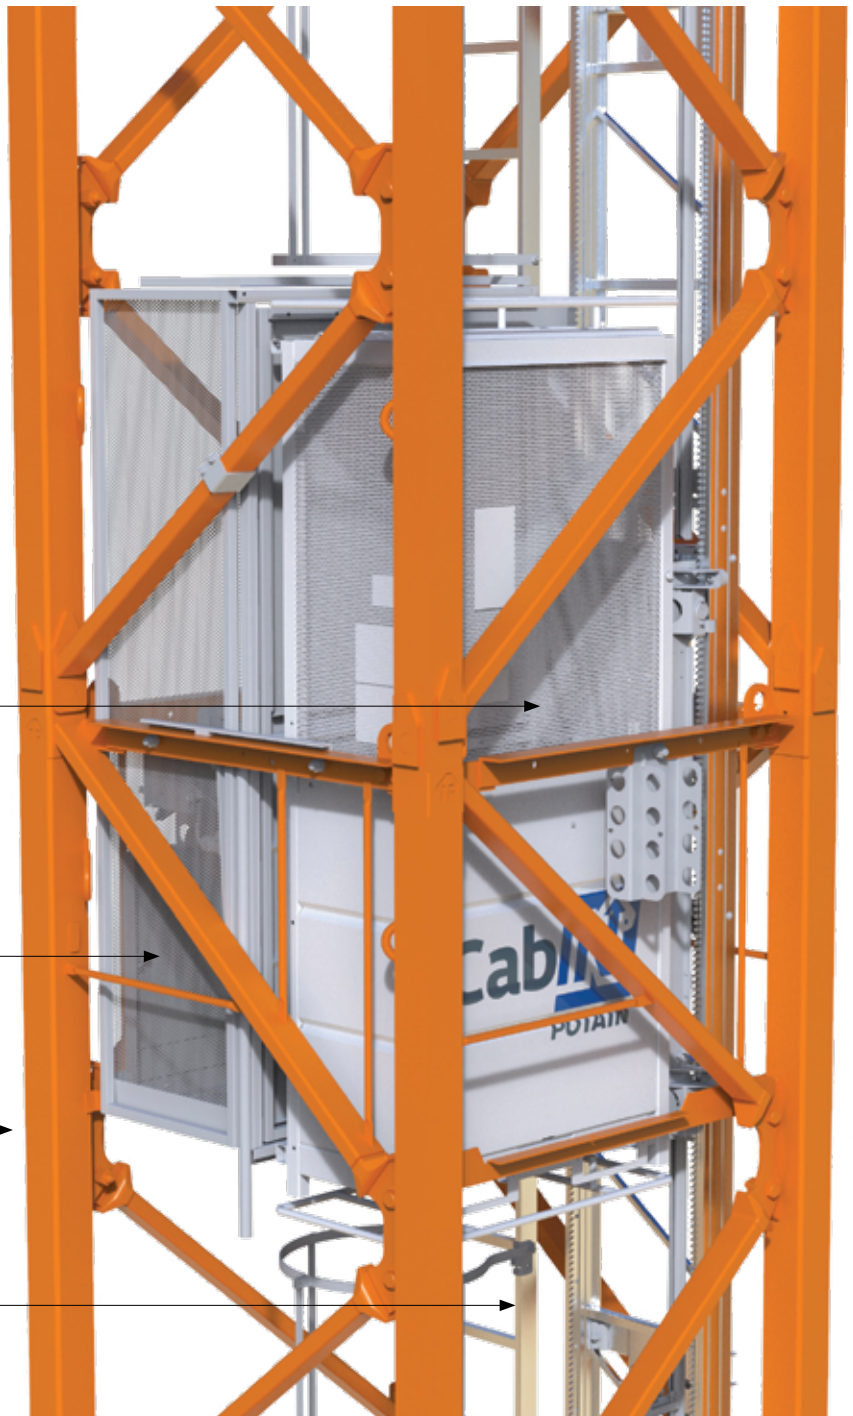

- > Potain Cab-IN operator lift provides full visibility

- > Departure / landing gates

- > Compatible with all Potain K Masts

- > Cab-IN maintains ladder access

# CAB-IN : EFFICIENT AND EFFECTIVE

## A new concept of internal mast operator lift

- Access ladders installed in parallel to the operator lift
- Developed in partnership with GEDA

### • Specifications:

- Lifting speed up to 24 m/min
- 200 kg load capacity / 2 people in the lift
- Cable winder: up to 60 m standard and up to 150 m (optional)

## Optimal mast fleet management

- Compatible with all K mast systems
  - Mast 1,6 m
  - Mast 2 m
  - Mast 2,45 m
- New Cab-IN mast access points are compatible with the existing mast access points.
- Compatible with all K mast bases
  - Fixing angles
  - Chassis
  - Cross shaped base

## The most cost effective operator lift solution

- Pre-installed into the mast from the factory
- Cab-IN installation is simultaneous with crane erection; with no additional assembly time required
- No extra storage costs
- No extra transport costs

## Designed for security and easy serviceability

- Access gates on departure and arrival levels
- Top and bottom sensors for additional security
- 360° visibility for mast inspection
- Maintenance on drive unit performed from the lift cab
