

POTAIN is committed to safety!

- Mast pins securing device (diameters 50/60/80 mm)

This lockable system prevents the risk of pins falling when the crane is dismantled.

- Anti-vibration tool to remove pins diameter 40 and 60 mm

The use of an unsuitable axle, spindle or tool creates a safety risk.

This system prevents the risk of hand crushing and vibration when the axles are difficult to remove.

Other tools will soon be added to this safety equipments!
