

ACCUMULATOR CHARGING KIT

Control of the nitrogen pressure in the accumulators is essential during installation and part of routine maintenance.

■ **Part Number** **02257617**

Consisting of:

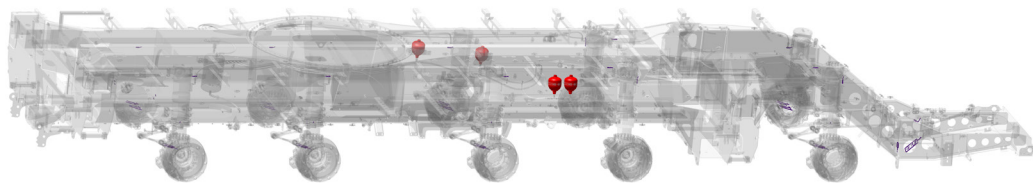

- | | |
|------------------------------------|----------|
| ▪ Hydac bladder accumulators | 03317057 |
| ▪ Leduc bladder accumulators | 03139028 |
| ▪ Case with insert (without tools) | 04163029 |
| ▪ Filling hose | 04163028 |
| ▪ Filling and testing device | 04163027 |

Additional Equipment (not included in kit):

Pressure gauge	04161641
Adapter for GMK 4100L-1 Tele Cylinder Accumulator	04183789
Adapter for GMK 5250L-1 Tele Cylinder Accumulator	03317055
Adapter for previous generation GMK cranes and TMS9000 Slewing Gear Valve Block Accumulator	90021930

MORE PRESSURE, MORE COMFORT!

If the pressure in the accumulators is too low, the following problems can occur:

- Loss of suspension comfort in the Megatrak
- Possible damage to the Megatrak cylinders, wishbones and ball joints of the steering rods
- Increased wear on tyres

The right tools can make all the difference and help to make regular maintenance quick and trouble-free.

PLEASE NOTE: All the products included in the kit can also be ordered individually.
Please contact your Grove Product Support for availability and pricing.
